PROFESSIONAL EXPERIENCE

Mid-Level Frontend Developer

May 2023 – present | Tehran

Raymon

- Improved system performance by 50% through refactoring MUI and cache configurations.
- Implemented a Single Sign-On (SSO) system for unified user authentication across all platforms.
- Simplified legacy project code, reducing complexity and enhancing stability using SOLID, DRY, and KISS principles.

Mid-Level Frontend Developer

Aug 2021 – Mar 2023 | Tehran

Shirik

- Worked closely with product designers, backend developers, and UI/UX designers to improve communication and streamline development.
- Created pixel-perfect webpages based on Figma designs.
- Ensured timely delivery of projects by contributing effectively to the development cycle and meeting milestones.

Junior Frontend Developer

Jan 2020 – Aug 2021 | Rasht

Pejvak Dadeh Khazar

- Enhanced the admin panel's functionality and performance, reducing page load times by about 5 seconds.
- Developed web applications with user role-based admin panels, improving user management and system administration with custom hooks and providers.
- Worked with UX designers to implement responsive design principles using a mobile-first approach.

Wordpress Designer and Frontend Intern

Jan 2019 – Dec 2020 | Rasht

Nilasoft

Designed various websites for company clients using WordPress, which helped me find my path and secure a front-end internship that launched my career.

Computer Repairs Technician

2018 – 2019 | Rasht

Khazar Informatic

As a computer technician, I was responsible for diagnosing and resolving issues with PCs and laptops. I also interacted with clients to explain the problems and discuss potential solutions.

SKILLS

Programming Languages

Javascript - Typescript - Python - HTML - CSS

Consuming Rest APIs

Axios - React Query - RTK Query

State Management

React Context - Redux - Redux Toolkit

Framework and Libraries

Reactjs - Nextjs - Express js - NestJs

Design Systems and Ui Kits

Bootstrap - TailwindCSS - MUI - Styled Component - Ant Design

Other

Sass - Git - Leaflet Map - PWA - Agile - Jest - React Testing Library - Unit Testing - MongoDB - web3 - threejs

PROJECTS

Furries Staking Platform [↗](#)

Stacking platform for Furries Tokens

The Furries NFT Staking Platform on the Solana network allows NFT holders to stake their assets, earn Fur tokens, and actively participate in the Furries ecosystem within the decentralized finance landscape.

Auth Shield [↗](#)

SSO Authentication

Auth Shield is a Single Sign-On (SSO) authentication web application that enables companies to authenticate users across all their projects from a centralized platform.

School finder

This project, designed and developed for the Ministry of Education and Training in Gilan Province, displays schools on a map, shows each school's capacity by grade, and indicates the registration area of each school. The application includes a ready-to-use administrative panel.

Nik Avazeh [↗](#)

Owlestic Landing and Admin Panels

Nik Avazeh's Owlestic provides an IoT-driven fleet management solution with features like real-time vehicle management, route optimization, geofencing, maintenance alerts, and driver behavior analysis. This solution enhances productivity, streamlines management, and reduces fleet costs.
